EDUCATION

University of California - San Diego - San Diego, CA

Computer Engineering, B.S./M.S. Program

Major GPA: 3.894

Sep. 2024 – June 2027

Honors and Selected Projects

- **Tau Beta Pi** — National engineering honor society.
- Built an embedded perception system using **YOLOv8** and **stereo depth (OAK-D)** for real-time tracking and servo control on Raspberry Pi.

De Anza College - Cupertino, CA

Computer Science & Engineering

GPA: 4.0

Sep. 2022 – June 2024

Academic and Technical Roles

- Served as Math & Science Tutor and Computer Science Teaching Assistant covering calculus, linear algebra, discrete math, physics, and programming in C++, Java, and Assembly, and provided hardware and software support as a Technical Support Volunteer.

EXPERIENCE

Embedded ML Engineer

Aerendir Mobile

Jul. 2024 – Present

Mountain View, CA

- Developed embedded machine learning pipelines for classifying biometric motion signals from inertial sensors on **Linux**-based mobile devices.
- Implemented sensor interfaces and inference components using C++, Python, Bash, and QML.
- Built Android applications for real-time biometric data streaming and workflow control.
- Prototyped automotive driver monitoring and security systems using steering-wheel biometrics, resulting in a pending patent application with me listed as a named inventor.

Electrical Engineering Intern

ABB Electrification

Jun. 2021 – Aug. 2023

Skien, Norway

- Assembled and wired industrial electrical cabinets and control panels based on engineering schematics.
- Supported production and testing of custom electrical systems for industrial clients.
- Mentored incoming interns and contributed to improved onboarding efficiency.

Data Management Intern

Cathwell

Jun. 2019 – Aug. 2020

Langesund, Norway

- Supported migration of legacy data systems to updated platforms, ensuring data integrity and minimal downtime.

TECHNICAL SKILLS

Systems & Platforms: Embedded Linux, Android, QML/Qt

Languages: C++, C, Python, Java, Bash, ARM Assembly

ML & Vision: Machine Learning, Computer Vision, OpenCV, NumPy, SciPy

Tools: Git, GitHub, VS Code, Vim, SSH

PROJECTS

Tryton — Underwater ROV

- Electrical lead for a modular underwater ROV integrating motor control, IMU stabilization, depth sensing, and real-time video streaming on embedded hardware.

EduBuddy — AI Learning Assistant

- Built an AI-assisted desktop learning tool using **Python** and large language models to provide contextual explanations, quizzes, and adaptive feedback in a hackathon setting.
